Sprint Goal: Dashboard Completion and Form Enhancements

Objective:

During this sprint, the team aims to build on the momentum from the previous sprint by completing the dashboard and finalizing key forms. The focus will be on adding final forms for the driver and shuttle, completing the registration form, and finishing the implementation of the logger for enhanced data tracking.

Key Tasks:

Complete Dashboard:

Implement remaining features and functionalities for the dashboard.
Ensure a polished and user-friendly interface.
Finalize Driver and Shuttle Forms:

Develop and integrate final forms for capturing driver and shuttle information.
Implement user-friendly design and validation for accurate data input.
Finish Registration Form:

Complete the registration form implementation.
Validate and optimize the form for seamless user interaction.
Logger Implementation:

Finish implementing the logger for comprehensive data tracking.
Ensure that the logger captures relevant information for analysis.

Expected Outcome:
By the end of the sprint, the team aims to have a fully completed dashboard, final forms for drivers and shuttles, a finished registration form, and a logger that enhances data tracking capabilities. This will significantly contribute to a more robust and feature-rich application.
Sprint Velocity and Expectations:
In the previous sprint, the team successfully completed 18 story points. For this sprint, with a focused scope, we anticipate achieving a similar or higher velocity. The completion of the dashboard and key forms is expected to contribute significantly to our project's advancement.

Team Collaboration:
Let's maintain effective communication, support each other, and collectively work towards achieving our sprint goals. If any challenges arise, we'll address them promptly and adapt our plans to ensure a successful sprint completion.
